
PREDATORS
IN THEIR
POCKETS
The World in Their Hands
Is Changing the Kids in Ours.
FOUR SESSIONS. ONE WAKE-UP CALL.
We thought we understood the danger.
Then technology changed what danger could do.
Algorithms figured out what they wanted.
Now, technology is figuring out who they are.
We taught kids to be careful what they share with technology.
We never imagined technology would stop asking.
Emerging technology watches them back.
It sees. Listens. Studies. Remembers. Mimics. Acts.
And it's moving beyond their pockets—
to their glasses, earbuds, bodies, and brains.
